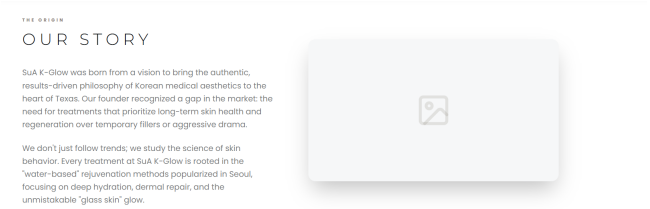
SuA Glow – About Us

Our Story Update



OUR STORY

SuA Glow is all about K-Beauty.

SuA Glow was created to bring the medical innovation, technical precision, and aesthetic philosophy of Korean skin health to patients across Dallas–Fort Worth who are searching for authentic K-Beauty techniques to achieve naturally youthful, glowing glass skin. In Seoul, dermatology clinics follow a different philosophy: healthy skin first, glow second. The focus isn't quick fixes—it's hydration, regeneration, and long-term skin quality.

As we all know, South Korea has become the global leader in aesthetic innovation, especially in skin boosters, micro-toxin treatments, and regenerative technologies such as exosomes that are redefining modern skin health.
Sophia Yang, Founder and CEO of SuA Glow, recognized a growing demand for the precision techniques developed in Seoul's leading dermatology clinics. Patients wanted the signature K-Beauty glow—smooth, deeply hydrated, naturally radiant skin—but those advanced treatments were rarely available outside of South Korea.

SuA Glow was created to change that.

Today, we bring those innovations closer to home—focusing on next-generation skin boosters, exosome-based regenerative treatments, and Seoul-inspired techniques designed to improve hydration, elasticity, and overall skin health.

Because the glow everyone talks about in K-Beauty? It isn't about makeup. It's about skin health.
And now, you don't need a flight to Seoul to find it.

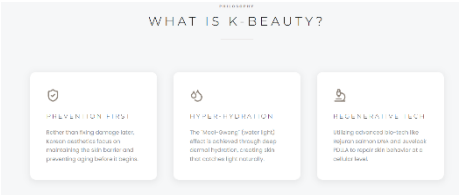
SuA Glow – About Us

What is K-Beauty



NEW SECTION: The SuA Glow Philosophy

K-BEAUTY MEDICAL AESTHETICS IN DALLAS–FORT WORTH

SuA Glow brings Korean medical aesthetic techniques and next-generation skin booster treatments to Dallas–Fort Worth, helping patients achieve the naturally smooth, hydrated "glass skin" glow Korean dermatology clinics are known for.

K-Beauty medical aesthetics focuses on improving skin health through hydration, regenerative treatments, and skin quality therapies rather than dramatic structural changes. Our protocols are inspired by leading dermatology clinics in Seoul, where many of the world's most advanced skin boosters, micro-toxin treatments, and regenerative technologies originate.

SuA Glow proudly serves patients from Carrollton, Dallas, Plano, Frisco, and throughout the Dallas–Fort Worth metroplex seeking Korean skin health treatments and authentic K-Beauty aesthetic techniques.

UPDATE: WHAT IS K-BEAUTY

How Korean Medical Aesthetics Really Works

Skin Health First
In K-Beauty dermatology, the focus begins with skin health. Korean clinics prioritize improving hydration, elasticity, and overall skin quality so skin looks smoother, stronger, and naturally radiant—while supporting each patient's personal aesthetic goals.

Hydration Is Everything
If there's one secret behind Korean glass skin, it's this: hydration drives skin health. Treatments often use Korean skin boosters, regenerative therapies, and advanced delivery techniques to hydrate the dermis—where real skin quality begins.

Naturally Enhanced Takes Work

SuA Glow – About Us

In K-Beauty, natural beauty isn't accidental, it's intentional. The goal is refined, balanced skin that looks healthy and radiant. At SuA Glow, we respect every beauty choice—whether your goal is subtle enhancement or a little extra glow.

Skin Quality Over Volume
While many aesthetic treatments focus on adding volume, Korean dermatology emphasizes improving skin quality. Treatments such as skin boosters, micro-toxin techniques, and regenerative technologies like exosomes help refine texture, elasticity, and overall skin health.

Prevention Over Correction
Korean dermatologist believes the best anti-aging strategy is starting before you need it. By supporting hydration, collagen production, and skin barrier health, patients maintain healthier skin over time.

UPDATE: ADD THIS PLEASE: Korean Skin Booster Treatments in Dallas–Fort Worth

SuA Glow specializes in Korean skin boosters, micro-toxin treatments, and regenerative skin therapies inspired by leading dermatology clinics in Seoul. These treatments are designed to improve hydration, elasticity, and overall skin quality.

Patients throughout Dallas, Carrollton, Plano, Frisco, and the greater DFW metroplex visit SuA Glow to experience Korean skin health treatments without traveling internationally.

What Is a Korean Skin Booster?

A Korean skin booster is a treatment designed to improve skin hydration, elasticity, and overall skin quality using injectable or advanced delivery techniques. These treatments help restore the smooth, hydrated "glass skin" glow Korean dermatology clinics are known for in Seoul.

Many of the world's most advanced skin boosters and regenerative treatments were developed in Seoul, South Korea, making it the global leader in aesthetic skin health innovation.

THE RESULT

Healthier, hydrated, resilient skin with the smooth, luminous glow Korean dermatology clinics are known for.

Because the glow everyone talks about in K-Beauty? It isn't about makeup. It's about skin health.

And now you can experience Korean skin boosters and regenerative skin treatments in Dallas–Fort Worth—without flying to Seoul. Just book with us at SuA Glow.

SuA Glow – About Us

UPDATE: Meet Sophia Yang

MEET SOPHIA YANG, PA-C

Seoul-Trained Korean Medical Aesthetics Specialist **(update this the black box below photo)**

Sophia Yang is a Seoul-trained medical aesthetics provider specializing in Korean skin health treatments, bringing advanced K-Beauty techniques to patients across Dallas–Fort Worth. SuA Glow is a Korean medical aesthetics clinic in Dallas–Fort Worth specializing in skin boosters, micro-toxin treatments, and regenerative skin therapies inspired by leading dermatology clinics in Seoul.

Sophia believes strongly in respecting everyone's beauty choices. Her philosophy is simple: aesthetic treatments should support each patient's personal goals, whether that means subtle refinement, improved skin health, or simply feeling more confident in your own skin.

In Korea, aesthetic medicine focuses on skin quality, hydration, and long-term skin health—not dramatic changes. Korean dermatology clinics are known worldwide for their precision techniques designed to improve hydration, elasticity, and overall skin quality.

Sophia trained in aesthetic techniques developed in Seoul's leading dermatology clinics, where many of today's most advanced skin boosters, micro-toxin treatments, and regenerative skin therapies originated.

At SuA Glow, she combines K-Beauty philosophy with the latest innovations in Korean skin boosters, exosome-based regenerative treatments, and Seoul-inspired injection techniques to help patients achieve healthier, smoother, naturally radiant skin.

Her approach is simple: precision technique, personalized care, and results that look naturally refreshed.

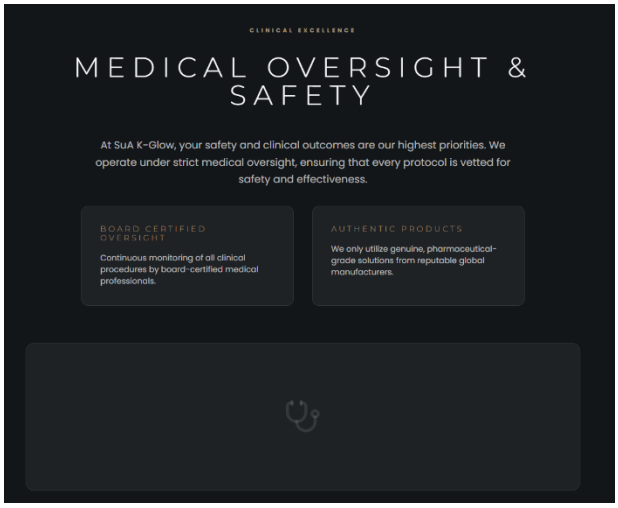
SEOUL TRAINED

<u>Advanced Korean Aesthetic Techniques</u>

Sophia's treatment protocols are inspired by leading dermatology clinics in Seoul, South Korea—the global center of innovation for skin boosters, regenerative skin therapies, and K-Beauty medical aesthetics.

Patients across Carrollton, Dallas, Plano, Frisco, and the greater Dallas–Fort Worth metroplex visit SuA Glow to experience Korean skin health treatments designed to improve hydration, elasticity, and overall skin quality.

UPDATE: Medical Oversight



MEDICAL OVERSIGHT & SAFETY

Clinical Excellence

At SuA Glow, your safety and clinical outcomes are our highest priorities. Every treatment is performed using carefully developed protocols designed to ensure consistency, safety, and effective results.

Our clinic combines physician oversight, advanced provider training, and globally sourced medical-grade products to deliver the highest standards of Korean medical aesthetics.

PHYSICIAN-LED MEDICAL OVERSIGHT

All treatments at SuA Glow are performed under the supervision of Dr. Adam Yang, MD, providing board-certified medical oversight and ensuring that every procedure follows evidence-based clinical standards for safety and patient outcomes.

AUTHENTIC GLOBAL PRODUCTS

We utilize only genuine, pharmaceutical-grade solutions sourced from reputable manufacturers in South Korea, Europe, and the United States to ensure product quality and safety.

SEOUL-INSPIRED TREATMENT PROTOCOLS

Our treatment techniques are inspired by leading dermatology clinics in Seoul, South Korea, the global center of innovation in skin boosters, regenerative therapies, and advanced skin health treatments.

ADVANCED PROVIDER TRAINING

Our providers receive specialized training in K-Beauty aesthetic techniques, including precision injection methods and advanced skin booster protocols.

PERSONALIZED SKIN CONSULTATIONS

Every treatment begins with a comprehensive consultation to evaluate your skin condition and develop a customized plan designed to improve hydration, elasticity, and long-term skin health.

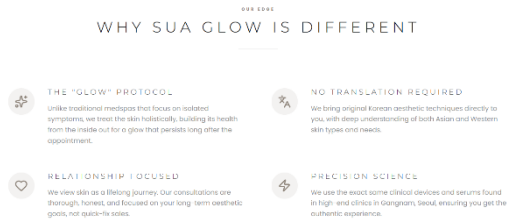
EVIDENCE-BASED CLINICAL PROTOCOLS

All treatments follow clinically supported protocols designed to optimize safety, treatment consistency, and predictable outcomes.

SKIN HEALTH FIRST PHILOSOPHY

Rather than temporary cosmetic fixes, SuA Glow prioritizes treatments that improve skin quality, hydration, and long-term skin resilience—the foundation of authentic K-Beauty results.

UPDATE: Why SuA Glow is Different



SUA GLOW: YOUR DESTINATION FOR K-BEAUTY MEDICAL AESTHETICS

WHY SUA GLOW IS DIFFERENT

1. Authentic Korean Medical Aesthetics

SuA Glow brings K-Beauty medical aesthetic techniques inspired by leading dermatology clinics in Seoul, South Korea to Dallas–Fort Worth. Our treatments reflect the philosophy used in Korean dermatology: improving skin health, hydration, and long-term skin quality.

---

2. Specialized in Korean Skin Boosters

We focus on next-generation Korean skin boosters and regenerative skin treatments designed to improve hydration, elasticity, and overall skin quality. These treatments help create the smooth, luminous “glass skin” glow Korean dermatology clinics are known for.

---

3. Physician-Led Medical Oversight

SuA Glow operates under physician supervision, ensuring that all treatments follow carefully developed medical protocols designed for safety, effectiveness, and predictable outcomes.

---

4. Personalized Skin Health Plans

Every treatment begins with a detailed consultation to evaluate your skin condition, hydration levels, and aesthetic goals. Treatment plans are customized to support long-term skin health rather than temporary cosmetic fixes.

---

5. The K-Beauty Skin Health Philosophy

Korean dermatology focuses on skin quality before structural change. Our treatments prioritize hydration, collagen support, and skin regeneration to create results that look naturally radiant—not overdone.
