

Professional Line

Rejuran® Healing Essence

Experience a lustrous glow with Healing Essence. This potent anti-aging formula helps support natural cell regeneration while deep hydration promotes a healthier-looking complexion. The signs of aging are reversed as a visibly smoother texture is improved and the look of damaged skin is reduced.

How Healing Essence Works

Healing Essence uses the latest DOT™ innovation from South Korea and is formulated with 2% Hydrolyzed DNA (PN) for skin rejuvenation. PN is delivered into the dermis to support skin's natural growth factors, thus promoting cellular turnover and collagen production, improving microcirculation and anti-inflammation. Rehydrates severely dry skin and improves the skin's natural barrier for a more luminous, translucent-looking skin.

Product Label: REJURAN® Healing Essence

Main Ingredient: 2% Hydrolyzed DNA (PN)
Capacity: 4 mL (2 mL x 2) / 0.13 fl oz

Packing Unit: 2 ea/1 box

Purpose of use: helps support natural cell regeneration while deep hydration promotes a healthier-looking complexion.

Part of use: Facial area

REhydrate skin to REveal a more radiant, translucent-looking complexion with this innovative skin rejuvenation treatment made with 2% Hydrolyzed DNA (PN) using the latest DOT™ technology.

Benefits

- Supports natural cell regeneration
- Promotes collagen production
- Visibly smooths fine lines and wrinkles
- Reduces the appearance of hyperpigmentation
- Rehydrates severely dry skin
- Reveals a more luminous, translucent-looking skin

Key Ingredients

- 2% Hydrolyzed DNA (PN)
- Mannitol

Protocol

1. Cleanse skin.
2. Apply a numbing product and allow it to absorb for 10-20 minutes. Wipe off excess before procedure.
3. Apply Rejuran® Healing Essence to the treatment area.
4. Set RF Microneedling device to appropriate depth and treat affected areas. If necessary, add steps 5 -7.
5. Mix Tone-Up Booster by transferring Vial I (Hydrolyzed DNA+Hyaluronic Acid – white bottle) to Vial II (Glutathione, Ascorbic Acid, Tranexamic Acid – aqua bottle). Shake for 30 seconds to agitate.
6. Apply the combined solution to the treatment area. Allow the product to penetrate into the skin.
7. Set RF Microneedling device to appropriate depth and treat affected areas.
8. Finish with Cryozet or other cooling and soothing treatment.

Results:

Improved hydration, pore size, redness, skin glow, skin firming, skin lifting, and brightness.

Rejuran® Trueskin Essence

This clinically-proven active ingredient smooths the look of fine lines and wrinkles for results that last for up to three months. Complemented with moisturizing and antioxidant properties, Trueskin Essence fights visible effects of environmental stressors, restores optimal hydration, and reveals a more radiant appearance.

How Trueskin Essence Works

Trueskin Essence penetrates the upper layer of the epidermis to deliver the active 1.5% Hydrolyzed DNA (PDRN), deep into the skin. From there, the marine-based DNA active interacts directly with cells to support collagen production and a balanced cellular turnover cycle. The effects are powerful and long-lasting: plumper, smoother, more youthful-looking skin.

Improve visible signs of aging and damage with Trueskin Essence, formulated with concentrated 1.5% Hydrolyzed DNA (PDRN)—a marine-based growth factor that supports skin rejuvenation on a cellular level.

Benefits

- Reduces the appearance of wrinkles and fine lines
- Supports skin's natural collagen production
- Supports a balanced cellular turnover cycle
- Promotes optimal hydration balance

Key Ingredients

- 1.5% Hydrolyzed DNA (PDRN)
- Sodium Chloride

Protocol

1. Cleanse skin.
2. Apply a numbing product and allow it to absorb for 10-20 minutes. Wipe off excess before procedure.
3. Apply Rejuran® Trueskin Essence to the treatment area.
4. Set RF Microneedling device to appropriate depth and treat affected areas. If necessary, add steps 5-7.
5. Mix Tone-Up Booster by transferring Vial I (Hydrolyzed DNA+Hyaluronic Acid – white bottle) to Vial II (Glutathione, Ascorbic Acid, Tranexamic Acid – aqua bottle). Shake for 30 seconds to agitate.
6. Apply the combined solution to the treatment area. Allow the product to penetrate into the skin.
7. Set RF Microneedling device to appropriate depth and treat affected areas.
8. Finish with Cryojet or other cooling and soothing treatment.

Results:

Improved hydration, pore size, redness, skin glow, skin firming, skin lifting, and brightness.

Product Label: REJURAN® Trueskin Essence

Main Ingredient: 1.5% Hydrolyzed DNA (PDRN)
Capacity: 4 mL (2 mL x 2) / 0.13 fl oz

Packing Unit: 2 ea/1 box

Purpose of use: Improves the look of wrinkles and gives skin a lasting supple appearance

Part of use: Facial area

Rejuran® Skin Booster

Pamper and rejuvenate your skin with our advanced Mesotherapy solutions.

Benefits

- Supports natural cellular regeneration
- Provides nutrients essential for collagen production & retains moisture
- Gives skin a more elastic look & reduces the appearance of wrinkles
- Four Amino Acids help skin recover from oxidative stress

Key Ingredients

- 1% Hydrolyzed DNA (PDRN)
- Hyaluronic Acid
- Glycine
- L-Lysine
- L-Leucine
- L-Proline

Protocol

1. Cleanse skin.
2. Apply a numbing product and allow it to absorb for 10-20 minutes. Wipe off excess before procedure.
3. Mixed Skin Booster Vial I (Hydrolyzed DNA+ Hyaluronic Acid) with Vial II (Amino acid complex). Allow the product to penetrate into the skin.
4. Set Microneedling devices to appropriate depth and treat affected areas. If necessary, add steps 5-7.
5. Mix Tone-Up Booster by transferring Vial I (Hydrolyzed DNA+Hyaluronic Acid – white bottle) to Vial II (Glutathione, Ascorbic Acid, Tranexamic Acid– aqua bottle). Shake for 30 seconds to agitate.
6. Apply the combined solution to the treatment area. Allow the product to penetrate into the skin.
7. Set Microneedling devices to appropriate depth and treat affected areas.
8. Finish with Cryozet or other cooling and soothing treatment.

Results:

Improved hydration, pore size, redness, skin glow, skin firming, skin lifting, and brightness.

Vial 1

- 1% Hydrolyzed DNA (PDRN)
- Hyaluronic Acid

Hydrolyzed DNA (PDRN)

DNA fragment extracted from Korean wild salmon by using DOT™ (DNA Optimizing Technology)

Skin Improvement Activator
Reinforcing skin's own barrier function

670 times smaller than skin pore size for enhanced rate of skin absorption

Proven PDRN® safety and efficacy in more than 2,000 scientific journals and 7 medical centers around the world

Hyaluronic Acid

Functions to retain water for your skin to be hydrated and plump

Reduces free radicals that result in skin aging and protects the skin from UV rays

Component of the EMC, contributes to cell proliferation and migration for the re-epithelialization of the skin

Vial 2

- 4 Types of Amino Acid
- Glycine
- L-Lysine
- L-Leucine
- L-Proline

Contains Glycine and Proline, essential components of collagen which account for 80% of the dermis layer

Helps build and maintain skin collagen you lose every year with aging

Contains Glycine, Proline and Leucine the components of elastin fibers in the dermis layer for keeping your skin healthy

Contains the essential amino acid of Lysine and Leucine (that are not made by the body) to help protein synthesis

Product Label: REJURAN® Skin Booster

Main Ingredient: 1% Hydrolyzed DNA (PDRN)

Capacity: 2 mL x 6

Packing Unit: Vial I (3 units), Vial II (3 units)

Purpose of use: Reinforces skin's own barrier function and helps boost collagen production.

Part of use: Facial area

Rejuran® Tone-Up Booster

Brighten and revive skin with this innovative, two-part Mesotherapy solution that improves skin tone and supports natural collagen production.

Benefits

- Evens and brightens skin tone
- Supports skin's natural collagen production
- Hydrates and soothes skin for a soft, supple feel
- Helps strengthen skin's natural barrier

Key Ingredients

- 1% Hydrolyzed DNA (PDRN)
- Hyaluronic Acid
- Panthenol
- Ascorbic Acid
- Glutathione
- Tranexamic Acid

Protocol

1. Cleanse skin.
2. Apply a numbing product and allow it to absorb for 10-20 minutes. Wipe off excess before procedure.
3. Mix Tone-Up Booster by transferring Vial I (Hydrolyzed DNA+Hyaluronic Acid – white bottle) to Vial II (Glutathione, Ascorbic Acid, Tranexamic Acid– aqua bottle). Shake for 30 seconds to agitate.
4. Set Microneedling devices to appropriate depth and treat affected areas. If necessary, add steps 5-7.
5. Mix Skin Booster Vial I (Hydrolyzed DNA+Hyaluronic Acid) with Vial II (Amino acid complex). Allow the product to penetrate into the skin.
6. Apply the combined solution to the treatment area. Allow the product to penetrate into the skin.
7. Set Microneedling devices to appropriate depth and treat affected areas.
8. Finish with Cryozet or other cooling and soothing treatment.

Results:

Improved hydration, pore size, redness, skin glow, skin firming, skin lifting, and brightness.

Product Label: REJURAN® Tone-Up Booster

Main Ingredient: 1% Hydrolyzed DNA (PDRN)

Capacity: Vial I 4 mL, Vial II NET WT. 0.1 g

Packing Unit: Vial I (3 units), Vial II (3 units)

Purpose of use: Brightens and revives skin while supporting natural collagen production.

Part of use: Facial area

Formulated with a powerful cocktail of clinically-proven active ingredients—including 1% Hydrolyzed DNA (PDRN), Hyaluronic Acid, Ascorbic Acid, and Tranexamic Acid—this dual-action treatment simultaneously evens skin coloration and rejuvenates dry, dull skin from the inside out. The result: a brighter, smoother, more hydrated complexion.

How Tone-Up Booster Works

This two-part treatment combines powerful skin-regenerating and brightening actives to dramatically improve the look and feel of skin. The power is in the ingredients:

- PDRN penetrates deep into skin to reinforce its barrier
- Hyaluronic Acid attracts hydration to the skin and helps boost water levels
- Ascorbic Acid, a form of Vitamin C and a potent antioxidant, brightens skin
- Tranexamic Acid helps even the look of skin

Vial I

- 1% Hydrolyzed DNA (PDRN)
- Hyaluronic Acid
- Panthenol

Combines PDRN, Hyaluronic Acid, and Panthenol to support skin's regeneration cycle and natural collagen production. These actives help strengthen the skin barrier, boost hydration, and soothe skin for a soft, supple feel.

Vial II

- Ascorbic Acid
- Glutathione
- Tranexamic Acid

A cocktail of powerful brightening ingredients at a highly effective ratio including Ascorbic Acid, Glutathione, and Tranexamic Acid. Together, they help dramatically improve skin tone for a brighter, more glowing appearance.
